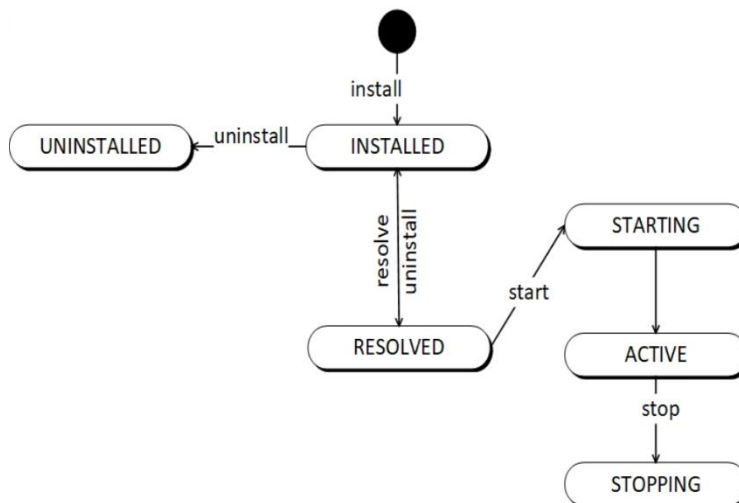

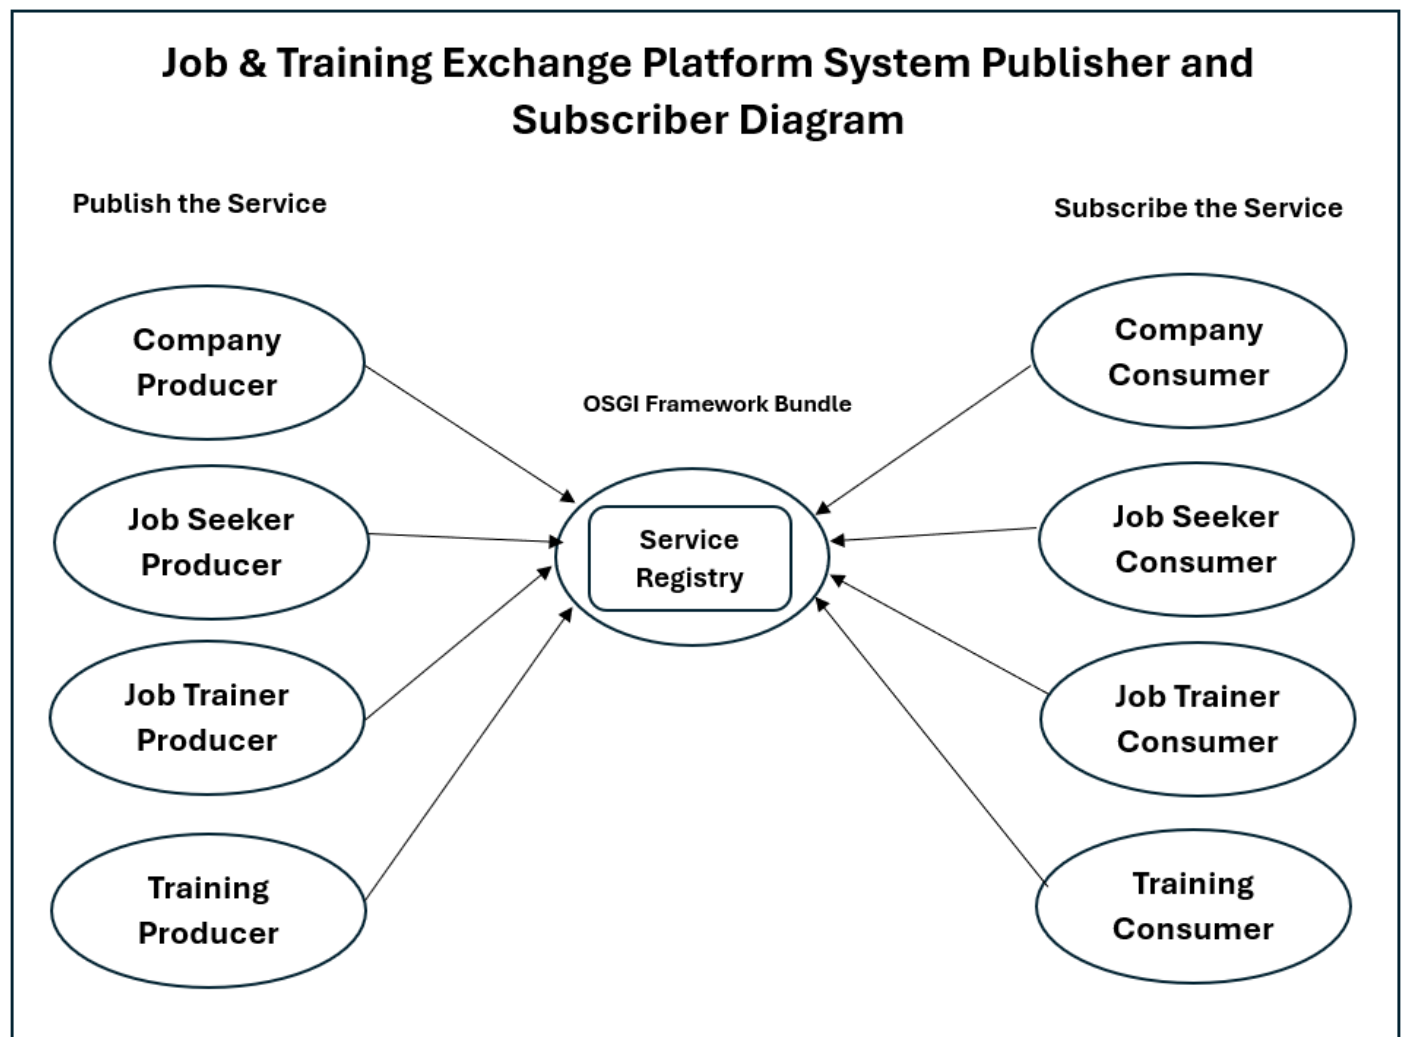

Figure 2: OSGI Behaviors

INTRODUCTION

The Job & Training Exchange Platform is a comprehensive platform designed to facilitate the interaction between companies, job seekers, job trainers, and training seekers. Utilizing the power of the OSGi (Open Service Gateway Initiative) framework, this portal offers a dynamic and modular architecture to efficiently manage and deliver various services.

- Company Producer
- Job Producer

Company Producer – Company Consumer

Companies Producer-Consumer provides a seamless platform for companies to interact with job seekers and other individuals. Company Consumer add information and manage their profiles, as well as to post and manage job listings. Leveraging the OSGi framework, the system efficiently communicates these details to consumers, such as job seekers, allowing them to access and apply for job opportunities. Additionally, by integrating with the Job Seeker Producer component, the system retrieves and delivers job applications, enriching the job-seeking experience for both companies and individuals. Through this cohesive producer-consumer model

Job Trainer Producer – Job Trainer Consumer

Job Trainer Producer – Consumers provides a seamless platform for individuals to interact with training seekers and their company. Job Trainer Consumers utilize the system to input their information. They have the flexibility to modify or delete their details as needed, ensuring accuracy and relevance of their profiles. Through dynamic service communication facilitated by OSGi, the system efficiently interacts with the Company Producer, leveraging this integration, job trainers gain access to the registered company information, enabling them to select and provide training services. This producer-consumer model fosters seamless communication between job trainers and companies within the OSGi environment, streamlining the process of connecting trainers with organizations and facilitating the delivery of training programs.

Manifest file of Job Trainer Producer

A screenshot of an IDE window titled 'JobTrainerProducer'. The window displays the contents of a manifest file (MANIFEST.MF) with the following text:

```
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: JobTrainerProducer
4 Bundle-SymbolicName: JobTrainerProducer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: com.mtit.JobTrainerProducer.JobTrainerActivator
7 Bundle-Vendor: MTIT
8 Bundle-RequiredExecutionEnvironment: JavaSE-17
9 Automatic-Module-Name: JobTrainerProducer
10 Import-Package: org.osgi.framework;version="1.3.0"
11 Export-Package: com.mtit.JobTrainerProducer
12
```

The IDE interface includes a tab for 'JobTrainerProducer' and a bottom panel with tabs for 'Overview', 'Dependencies', 'Runtime', 'Build', 'MANIFEST.MF' (which is selected), and 'build.properties'.
